Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Chisholm.

Chisholm shows metallic wire mesh pressed between two plates (9 in Fig. 5). This structure reads on the above claims; the lower plate 9 reads on the “heat conducting interface”, the upper plate reads on the claimed “press plate”, and the set of warps or woofs in the metal mesh structure (i.e. wires extending in parallel in one direction in the mesh) read on the claimed “plurality of heat conducting metal threads”. Note in regard to claim 5 that, as pointed out above, only one set of the warp and woof wires in the mesh reads on the claimed wires, and these clearly are arranged in parallel with each other; the use of the term “comprising” in claim 1 permits the presence of elements in addition to those recited (i.e. the additional wires perpendicular to the first set).

Claims 6 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The remaining references show various metal wire structures mounted between two platen-like structures.
